

JULIA'S FLOWERS

Julia is called back to the town she left years ago, when she was still Álvaro. Her brother has died, and her mother—seriously ill—refuses the surgery that could save her. Julia must return to authorize it.

When she arrives, nothing is as expected: her mother doesn't recognize her. Forced into the same house, in the middle of grief and failing health, a new and uncertain bond begins to take shape.

In a place marked by old wounds and present fears, Julia must decide whether to reveal her identity, whether any kind of connection is still possible, and whether she can respect her mother's choice—even if it breaks her.
